

The Quran App

By Amna Tanveer

Problem & Idea:

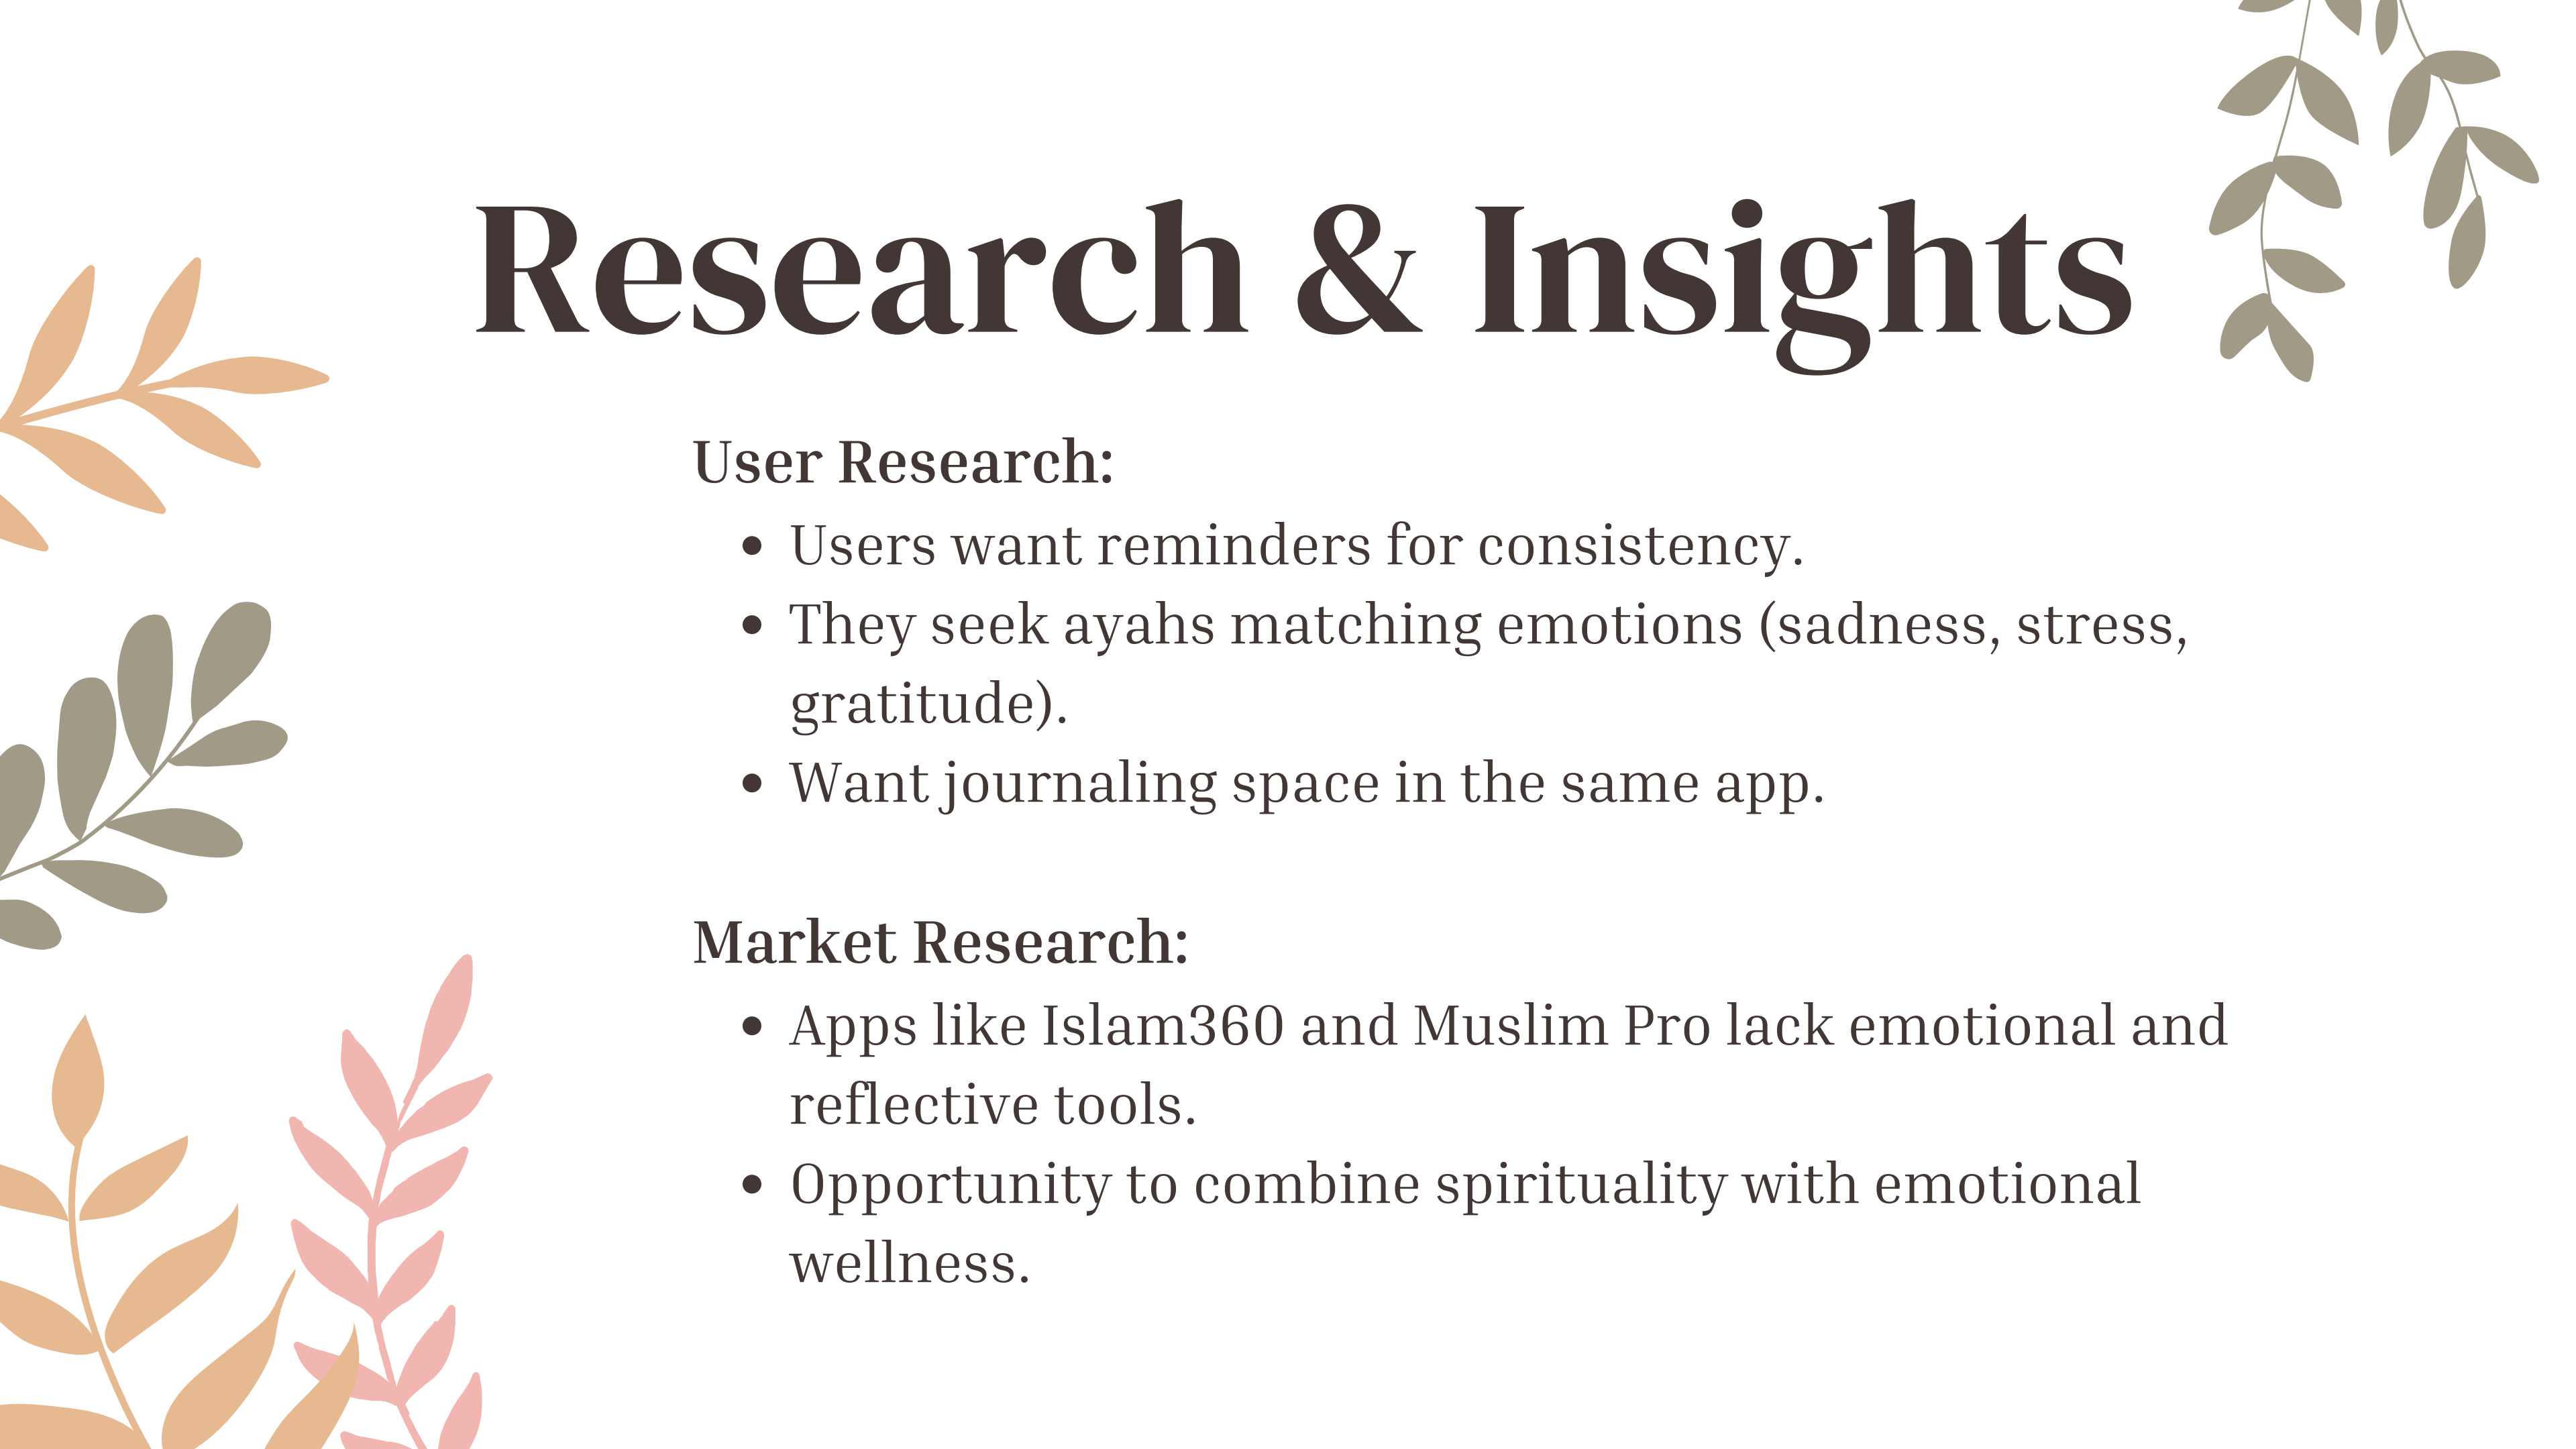

Problem:

Most Quran apps focus only on reading or translation. Users struggle with consistency, emotional connection, and reflection.

Idea:

Create a personalized Quran app that helps users:

- Read the Quran (Arabic + English)
- Reflect and write journals
- Get AI-based ayah suggestions based on their mood
- Stay consistent through reminders and progress tracking

Research & Insights

User Research:

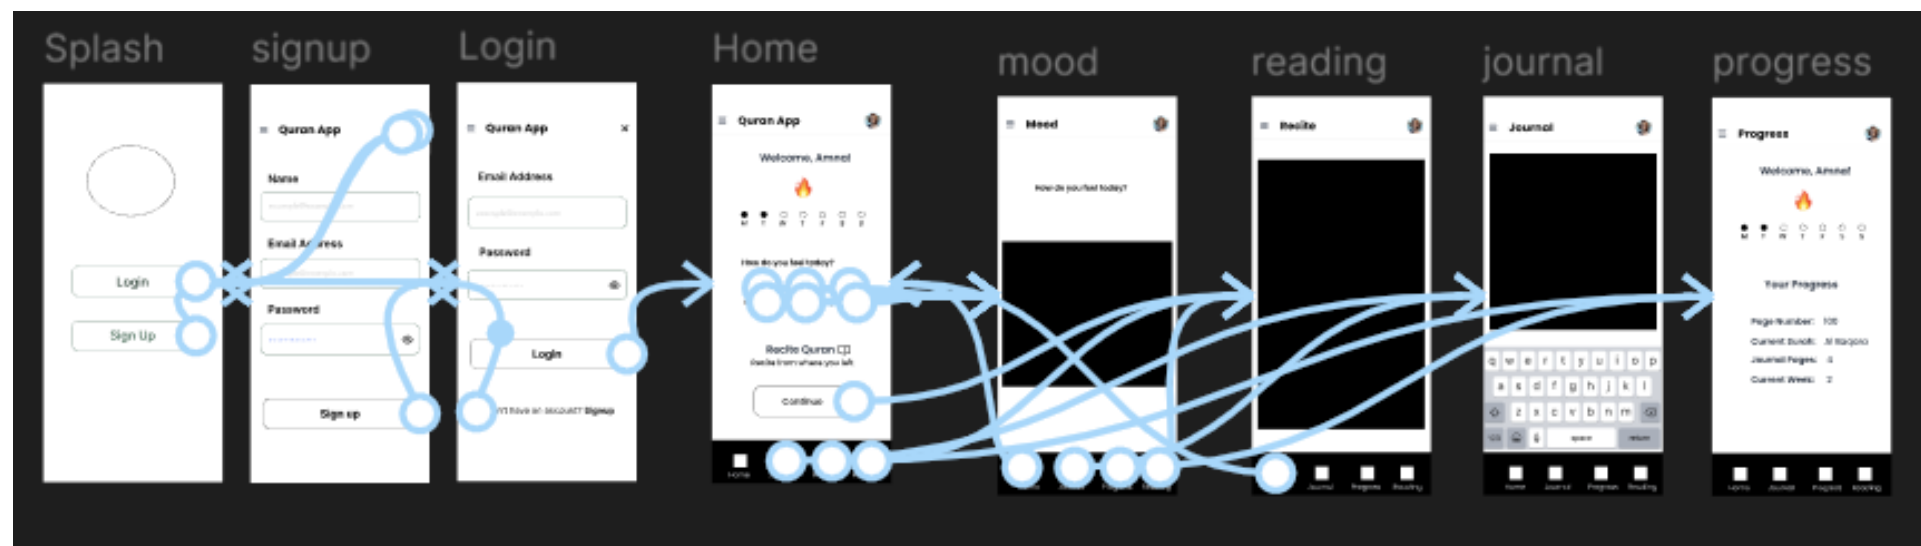

- Users want reminders for consistency.
- They seek ayahs matching emotions (sadness, stress, gratitude).
- Want journaling space in the same app.

Market Research:

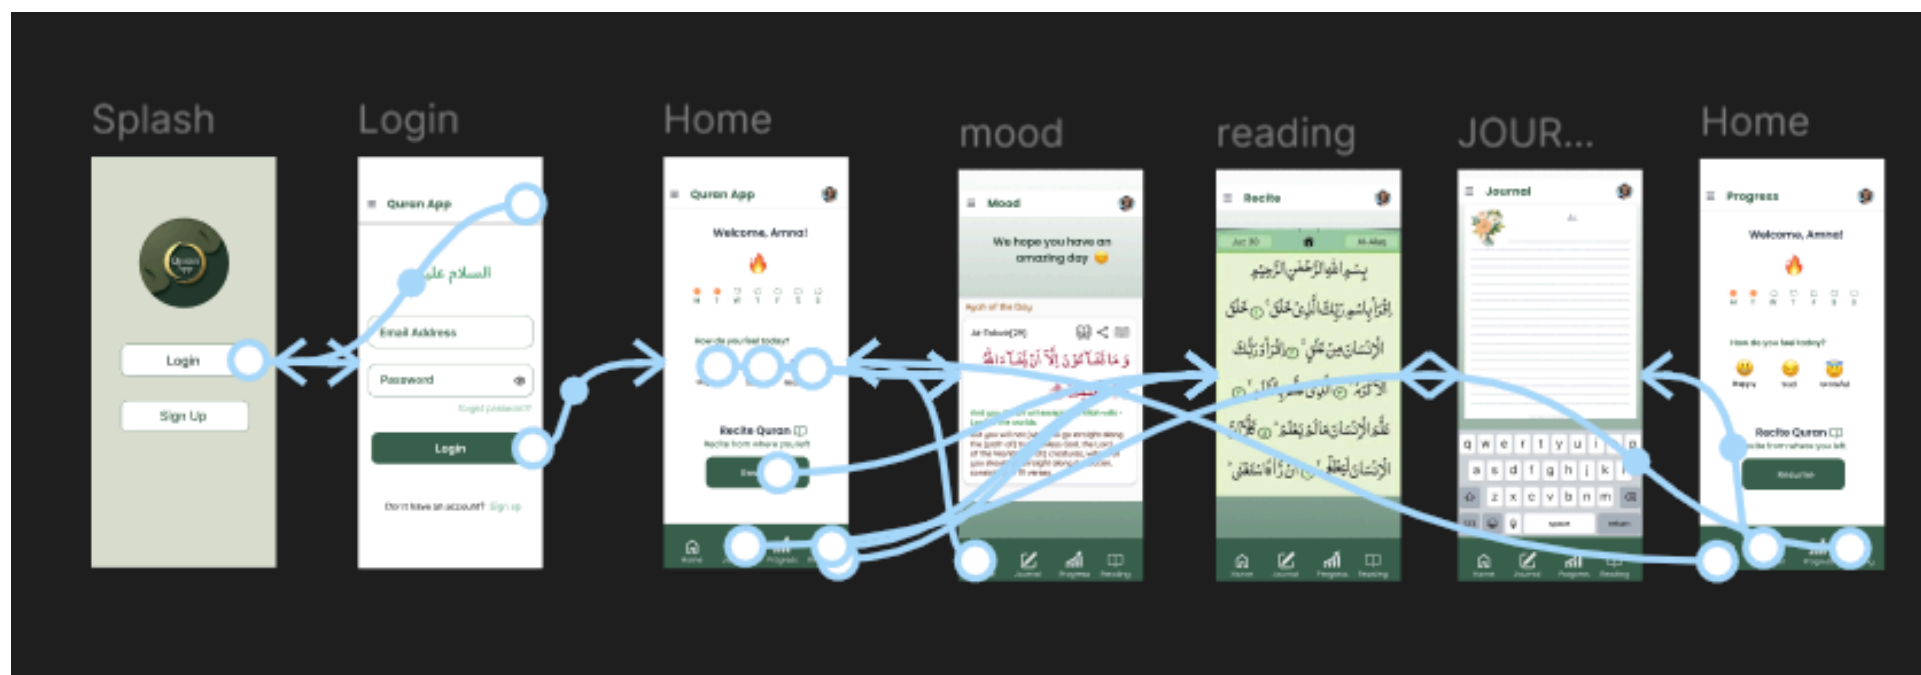

- Apps like Islam360 and Muslim Pro lack emotional and reflective tools.
- Opportunity to combine spirituality with emotional wellness.

Solution & Prototype

LO-FI PROTOTYPE

HI-FI PROTOTYPE

Testing & Feedback

What We Tested:

- Mood selection + ayah suggestions
- Journaling and AI summaries
- Reminder and progress tracking

What Worked:

- Personalized ayah flow felt meaningful
- Journaling encouraged reflection
- Progress tracking motivated users

Needs Improvement:

- Fewer mood options (simplify UI)
- Add bookmarks and offline mode

Launch & Reflection

Go-to-Market Plan:

- Phase 1: MVP (reading, journaling, reminders)
- Phase 2: AI features (mood-based ayahs, summaries)
- Phase 3: Community reflections and sharing
- Launch during Ramadan with influencer partnerships

Metrics:

- Daily active users • Retention rate • Streak length • Engagement

Reflection:

- Focus on emotional needs, not just functionality.
- Simplicity and early feedback are key.
- Build for both spiritual and emotional growth

The image features a central text block surrounded by decorative elements. In the top-left corner, there are stylized leafy branches in shades of orange and brown. In the top-right corner, there are similar branches in shades of green and brown. In the bottom-left corner, there are branches in shades of orange and brown. In the bottom-right corner, there are branches in shades of pink and brown. The text is centered and reads:

Thank You
