

Step 2: Roadmap (Now / Next / Later)

Now (MVP):

- Daily reminders & streaks
- Basic gamification (badges)

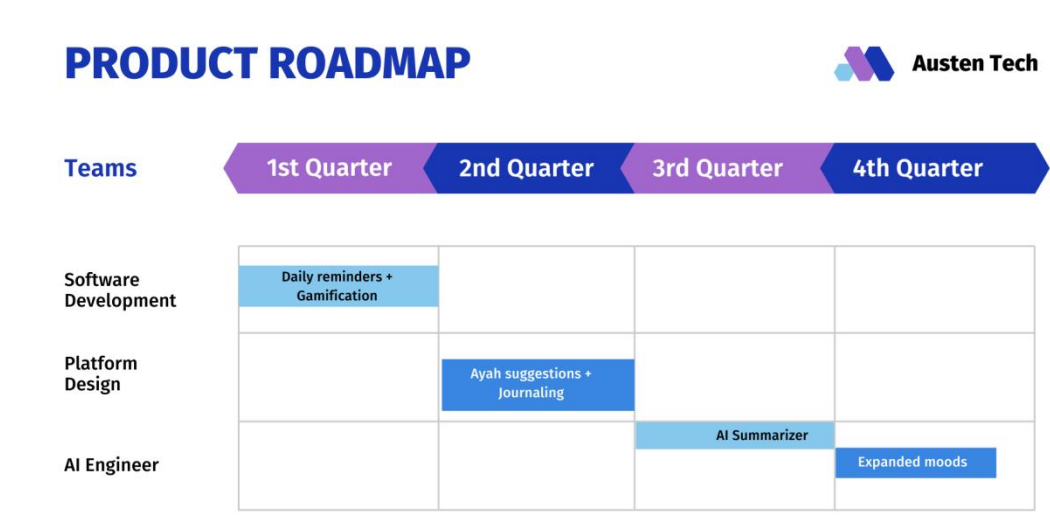

Next (after MVP validation):

- Mood → Ayah suggestion (limited moods: happy, sad, stressed)
- Journaling (simple text reflections)

Later (advanced features, after traction):

- AI-powered summarizer for journal entries
- Expanded mood/ayah database

Feature Roadmap:

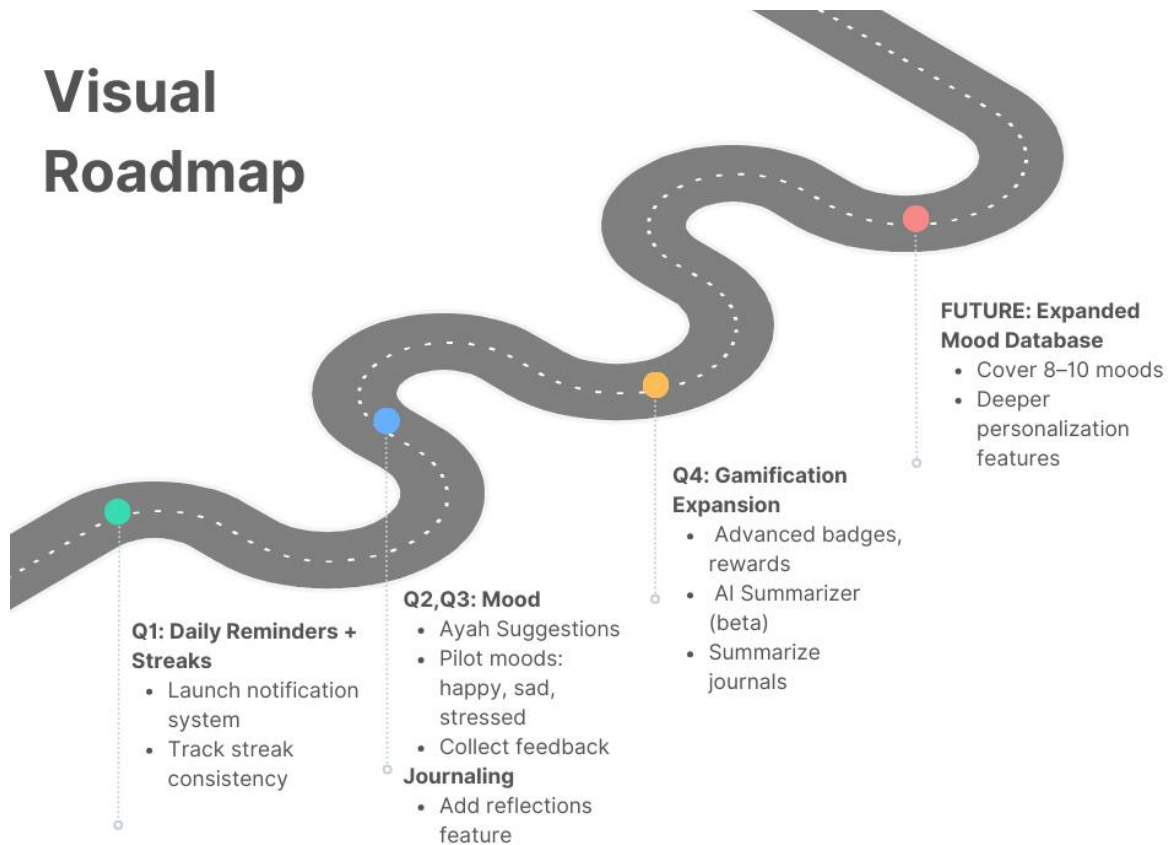

Agile roadmap

	SPRINT 1.1 (MVP FOUNDATIONS)	SPRINT 1.2 (ENGAGEMENT FEATURES)	SPRINT 1.3 (PERSONALIZATION PILOT)	SPRINT 2.1 (REFLECTION & JOURNALING)	SPRINT 2.2 (ADVANCED FEATURES)
DEVELOPMENT	- Notification system (daily reminders) - Backend setup for streak tracking	- Gamification (streak badges, simple rewards) - Backend support for streak logic	- Mood → Ayah suggestion (happy, sad, stressed) - Feedback collection system	- Journaling feature (text input, save entries) - Sync to user account	- AI summarizer (limited dataset) - Expand moods (6-8 total)
PRODUCT	- Define MVP scope - Feature requirements (reminder + streaks)	- Roadmap brief for next set of features - Define gamification rules	- Pilot mood-based ayah feature - Collect early user feedback	- Launch journaling beta - Collect customer testing feedback	- Backlog grooming + A/B testing plan - Feature release management
UX	- Wireframes for home screen + streak badge - Simple notification flow	- UI design for streak badge + rewards - Notification UX improvements	- Design mood selector interface - Feature-level design for ayah suggestions	- Journaling UI/UX audit - Iterations on mood-based UI	- High-level design for AI summarizer output - Refined mood → ayah flow
QA	Basic metrics tracking (daily active users, streak starts)	- QA on reminders + gamification - Initial user testing	- Variance testing on moods - Validate accuracy of suggestions	- UAT (user acceptance testing) - Security testing for private journals	- PM testing for AI summarizer accuracy - Regression testing on all features

OUTCOME BASED ROADMAP

 Goal	 now	 next	 later
G1: Build daily Quran engagement habits	- Daily reminders launched → 30% of users engage at least once daily - Basic streak badge → 20% maintain 7-day streaks	- Mood → Ayah suggestion live for 3 moods (happy, sad, stressed) - Journaling feature → 25% of active users log at least 1 reflection per week	- AI summarizer → 10% of journal entries summarized monthly - Daily usage → 50% of users open the app 4+ times per week
G2: Personalize Quran experience for emotional and spiritual needs	- Collect baseline data on user emotions + reading frequency - Launch simple feedback loop (emoji / star rating for ayah suggestions)	- Expand mood-based ayah library → coverage of 6-8 moods 35% of users report mood-based suggestions as “helpful”	- AI-enhanced mood recommendations → 20% increase in daily engagement - At least 40% of active users use mood-based ayahs weekly
