Simple User Story

TITLE	User Story 1: Daily Reminder for Quran Reading
PRIORITY	High
ESTIMATE	5 story points
USER STORY	As a daily user , I want to receive a Quran reading reminder at my preferred time , so that I can build a consistent daily habit of reflection .
ACCEPTANCE CRITERIA	Given the user has set a reminder time, When the time is reached, Then the app sends a push notification reminding them to read an ayah, And the reminder repeats daily unless turned off.

Simple User Story

TITLE	User Story 2: Streak Tracker
PRIORITY	High
ESTIMATE	8 story points
USER STORY	As a motivated user , I want to track my daily Quran reading streak , so that I can stay consistent and feel encouraged .
ACCEPTANCE CRITERIA	Given a user completes a daily reading, When it's logged, Then the streak counter increases by one day, And the app displays a badge or message celebrating progress.

Simple User Story

TITLE	User Story 3 : Mood-Based Ayah Suggestions
PRIORITY	Medium
ESTIMATE	8 story points
USER STORY	As a reflective user , I want to select my current mood , so that I can read ayahs that bring comfort or guidance relevant to how I feel .
ACCEPTANCE CRITERIA	Given a mood is selected from a list, When the selection is made, Then an ayah related to that mood appears on screen, And the user can save or favorite it for later reflection.

High	10 story pts	Given the user finishes reading an ayah, when they open the journal section, then they can type, save, and retrieve reflections securely.	Sprint 3

SAFe User Story 1

User Story	As a daily user, I want to receive Quran reading reminders so that I can build a consistent daily habit.		
Description	A reminder feature that notifies users at their chosen time each day to read Quran.	Hypothesis	Users who receive reminders are 40% more likely to maintain daily reading streaks.
Nonfunctional Requirements	Notification delivery must be <2s latency, supports Android/iOS, follows privacy compliance.	Acceptance Criteria	Given the user sets a reminder time, when the time arrives, then the app sends a daily notification.
User Business Value	High	Cost Of Delay	High (habit engagement)
Time Criticality	Immediate	Job Size	5 pts
Risk Reductions	Reduces risk of user churn due to inactivity.	Weighted Shortest Job First (WSJF)	$(10+10+9)/5 = 5.8 \rightarrow$ WSJF 5.8
Notes	Core engagement feature for MVP. Add quiet hours in next iteration.		

SAFe User Story 2

User Story	As a motivated reader, I want to track my daily streak so that I can stay motivated and consistent.		
Description	Tracks consecutive days of reading with visible streak counter.	Hypothesis	Gamification increases session return rate by 25%.
Nonfunctional Requirements	Must sync across devices; low data load time (< 1s).	Acceptance Criteria	Given a session is completed, when it's logged, then the streak updates..
User Business Value	High	Cost Of Delay	Medium
Time Criticality	This Sprint	Job Size	8 pts
Risk Reductions	Builds retention habits; mitigates drop-off risk.	Weighted Shortest Job First (WSJF)	$(9+8+8)/8 = 3.1 \rightarrow \text{WSJF } 3.1$
Notes	Link to badges and share option for motivation.		

SAFe User Story 3

User Story	As a reflective user, I want to select my current mood so that I can read ayahs matching my emotions.		
Description	Mood selector offering personalized ayahs.	Hypothesis	Personalized experiences boost engagement by 30%.
Nonfunctional Requirements	Must retrieve ayahs within 2s; accurate emotional mapping.	Acceptance Criteria	Given a mood is selected, when confirmed, then the app shows a relevant ayah.
User Business Value	High	Cost Of Delay	Medium
Time Criticality	Next Sprint	Job Size	8 pts
Risk Reductions	Reduces risk of low emotional engagement.	Weighted Shortest Job First (WSJF)	$(8+7+7)/8 = 2.8 \rightarrow \text{WSJF } 2.8$
Notes	Future versions can integrate AI for deeper personalization
