

PRODUCT VISION BOARD

VISION

Inspiring: To encourage Muslims to create a lifelong, mindful connection with the Quran by habits like daily reading, reflection, and emotional awareness.

Shared: To build a platform that combines individuals, families, and communities in their spiritual path and helps them growth.

Ethical: To offer a safe, secure, respectable, and private space that encourages spiritual well-being without harming or exploiting anyone.

Concise: To deepen your connection with the Holy Quran, regularly.

Ambitious: To become the globally most trust worthy and widely used digital partner for Holy Quran reading and reflection, assisting millions of users from different generations.

TARGET GROUP

Clear: Muslims between the age 18–35 who want to create a regular Quran reading habit, parents who want to guide children, and reverts/new Muslims who need a platform convenient learning.

Specific: If an individual is Muslim, interested in personal Quran study, and uses apps for self-improvement, they are in the target group.

Cohesive: They need features like valuing personal development, searching for spiritual connection, and being easy with technology. Subgroups include youth, parents, and reverts.

NEEDS

Outcome-based: People desire to build consistent Holy Quran reading, comprehend the meaning, and sense emotionally connected. Victory means regular engagement, adequate understanding, and more emphatic spiritual reflection.

Specific: They require tools for translation, progress tracking, journaling, and emotional insights.

Focused: The major concern resolved is the inconsistency and absence of structured meditation in the Holy Quran reading.

Prioritised:

Produce constant Holy Quran reading practices.

Comprehend definition (translation).

Meditate spiritually by journaling.

Acquire emotional understanding.

Track progress and goals.

PRODUCT

Type: Mobile app.

Differentiated: Integrates Quran tilawat tools with progress tracking, journaling, and AI-powered emotional understandings that make it a special blend not widely present in one platform.

Focused: Core features are limited to 4–5: Holy Quran reading, progress tracking, journaling, and AI mood-based ayah recommendations.

Big: Each feature represents a broad capability: reading experience, habit-building system, reflection mechanism, spirited advice, and society help.

BUSINESS GOALS

Outcome-based: Develop a devoted user base, generate frequent revenue, and create brand confidence as the top Quran reflection tool.

Specific:

Reach 50k+ active users in 12–18 months after release.

Analyze sustainable revenue opportunities (like freemium upgrades or one-time purchases).

Prioritised:

User growth (foundation for everything else).

Income generation by subscriptions.

Produce credibility and brand prestige.

Associations to advance reach and power.

Press Release (PR)

My App Helps Muslims Create Consistent Holy Quran Reading Habit with AI-Powered Mood-based Ayah Suggestions

Many Muslims struggle to retain a standard relationship with the Holy Quran, often finding it difficult to remain consistent or to reflect purposefully on what they read.

Today, we're excited to announce the launch of **DeenJourney**, a mobile app that brings Quran reading, journaling, and emotional insights together in one simple platform.

With **DeenJourney**, people can:

- Read the Quran, along with English translations.
- Track their improvement with reminders, daily milestones, and habit streaks.
- Journal reflections are presently linked to verses.
- Acquire emotional understanding through AI-powered insights into their reflections.

Unlike existing Quran apps that focus only on recitation or translation, **DeenJourney** combines spiritual routine with individual growth mechanisms. It's developed for anyone who desires to build a uniform, significant association with the Holy Quran in daily life.

Early testers note that the app makes it more manageable to remain motivated, reflect profoundly, and bond emotionally with their Quran reading.

DeenJourney is available for download on Android.

FAQ

Q1. Who is this app for?

Muslims aged 18–35 who want regularity in Quran reading, parents navigating children, and reverts/new Muslims who need attainable advice.

Q2. What problem does it solve?

It manages inconsistency in Quran reading, insufficiency of reflection apps, and the demand for emotional awareness in spiritual evolution.

Q3. How is this different from other Quran apps?

Most Quran apps focus on recitation or translation only. This app combines reading tools, progress tracking, journaling, and AI-powered emotional understandings into a holistic strategy to Quran engagement.

Q4. How will success be measured?

- 50k+ active users within 12–18 months.
- 30%+ of users engage everyday or weekly in reading/journaling.
- Positive user feedback on spiritual evolution and consistency.

Q5. Is the app free or paid?

The pricing standard is still being studied. Options include freemium with premium features or a one-time purchase or completely free. The focus is accessibility for all.

Q6. What risks are there?

- Adoption may be slower if users adhere to existing apps.
- Distress about the use of AI in the religious domain.
- Discovering the proper monetization model without excluding users.

Q7. How will data and privacy be handled?

User reflections, journaling and emotional insights will stay confidential and protected. No data will be intercommunicated without user authorization.

Q8. What's next for the product?

- Augmenting tafseer and language support.
- Investigating community features for shared reflection.
- Partnering with Islamic organizations to grow reach.
